

Extra Wide Roller Conveyors

Extra wide 460mm frame fitted with 390mm wide rollers.

Unique extruded aluminium frames make our conveyors lighter, straighter and easier to install than conventional steel gravity conveyors.

Adjustable PVC rollers with metal bearings minimise marking of your material and ensure a smooth even feed.

Roller Conveyor kits are available in continual lengths of 3.0 and 4.5 Metres. Custom kits can be configured to your specific requirements.
